

FGEN Website Update Specifications

Requested website changes and Django admin/content-management updates

This document converts the requested website changes into implementation-ready requirements. The goal is to make each requested change clear and straightforward to implement and test.

1. Improve Text Visibility

Location	Site-wide / relevant sections
Details	Request: Change the “Testimonials” title and “Vision and Mission” text to black and bold. Reason: The current text is difficult to read against the white background. Expected result: Both pieces of text should have sufficient contrast and clearly appear black and bold.

2. Add “Executives” Section to About Us

Location	About Us page
Details	Request: Add a new section titled “ Executives ” below the existing “Leadership Team” section on the same About Us page. Content: The new section should support adding five additional people, using a presentation/layout similar to the existing Leadership Team section. Important: This should remain on the existing About Us page; do not create a separate page for Executives.

3. Remove Plus Signs

Location	Website UI
Details	Request: Remove the visible “+” signs from the website. Expected result: The plus signs should no longer appear in the relevant interface elements.

4. Fix Contact Us Page

Location	Contact Us page
Details	Issue: The Contact Us page currently produces an error notification and is not functioning correctly. Request: Diagnose and fix the underlying issue so the page loads and functions normally. Acceptance criteria: The page should open without an error and its existing contact functionality should work as intended.

5. Make Programs Page Editable + Add Booking Form

Location	Programs page / Django admin
----------	------------------------------

Details	Request A — Django admin: Make the Programs page content editable through Django admin. There is currently no way to update this page through the admin interface. Request B — Page title: The title should be “FGEN Neuroscience Presentations” only. Request C — Google Form: Embed or add the following Google Form to the Programs page: Form name: FGEN School Presentation Booking Form Form URL: https://docs.google.com/forms/d/e/1FAIpQLSdIhvxzePims9xAsK5zBZjiV1AxRc5NLrzN0g5mOjDi1MgGAg/viewform?usp=header Acceptance criteria: An administrator should be able to edit the relevant Programs page content from Django admin, and visitors should be able to access/complete the booking form from the page.
----------------	--

6. Add Executive Applications Section + Admin Editing

Location	Get Involved page / Django admin
Details	Request A — New section: Add a section below “Partnerships” titled “FGEN EXECUTIVE APPLICATIONS”. Section description: “FGEN executive applications are now closed. Please apply next year when applications open in June 2027.” Request B — Django admin: Make the Get Involved page descriptions editable through Django admin. Request C — Google Form: Add a Google Form titled “FGEN Executive Applications”. Form URL: https://docs.google.com/forms/d/e/1FAIpQLSdfEDzaa6oqu686U37-0QtKxjJ4p2i47Hf9snLAdtzWOgc1kQ/viewform?usp=header Acceptance criteria: The new section appears below Partnerships, the specified description is displayed, the page description can be edited through Django admin, and the application form is accessible from the page.

Implementation Checklist

- Text contrast/weight updated for Testimonials and Vision and Mission.
- Executives section added below Leadership Team on About Us.
- Five additional executive profiles can be added in the new section.
- Visible plus signs removed.
- Contact Us page error identified and resolved.
- Programs page made editable through Django admin.
- Programs page title set to “FGEN Neuroscience Presentations”.
- School Presentation Booking Form added to Programs page.
- Get Involved page updated with FGEN EXECUTIVE APPLICATIONS section below Partnerships.
- Get Involved descriptions made editable through Django admin.
- FGEN Executive Applications form added to the Get Involved page.

- All changes tested on the live-facing site for correct display and functionality.

Note for implementation: Where a requested item is intended to be editable by a non-technical administrator, the corresponding Django admin field/content model should be exposed in the admin interface rather than requiring code changes.
